PROFESSIONAL SUMMARY

Backend Developer with 2+ years of experience building scalable **REST APIs** and **event-driven microservices** using **Java, Spring Boot and Kafka**. Experienced in **Redis caching, MSSQL, AWS cloud deployment and Docker/Kubernetes containerization**. Strong focus on **performance optimization, clean architecture, SOLID principles and production-grade financial systems**.

SKILLS

Backend	Java, Spring Boot, Spring Cloud (Eureka, Config Server), Microservices, REST APIs
ORM & Architecture	Hibernate / JPA, Spring Data JPA, Design Patterns, SOLID, Clean Architecture
Databases	Microsoft SQL Server, Snowflake
Messaging & Caching	Apache/Confluent Kafka, Redis, Garnet
Resilience & Logging	Resilience4j, SLF4J, Micrometer, Prometheus, Spring Boot Actuator
Cloud & DevOps	AWS, Azure, Docker, Kubernetes, GitHub Actions, Maven, Git
API & Quality	Swagger / OpenAPI, Postman, SonarQube, JUnit, Mockito, TDD, JWT Security
AI Tools	GitHub Copilot, Azure Document Intelligence, Claude Code, Open Code

EXPERIENCE

Software Engineer Geojit Technologies	May 2024 – Present <i>Kochi, Kerala</i>
---	--

- Designed and developed secure **RESTful APIs** using **Spring Boot** for enterprise financial platforms serving thousands of daily active users.
- Implemented **Kafka-based microservices** for real-time trade and transaction processing, handling high-volume event streams in production financial systems.
- Integrated **JWT-based API security**, implemented backend validation workflows, and documented APIs using **Swagger / OpenAPI**.
- Implemented **Redis caching** reducing database load by **30%** and improving API throughput under peak trading hours.
- Containerized services using **Docker** and deployed backend applications on **AWS** with **Kubernetes** orchestration.
- Applied **Circuit Breaker, API Gateway**, and **Service Discovery** patterns in microservices architecture.
- Maintained code quality using **SonarQube**, enforcing SOLID principles and clean architecture standards across the team.

PROJECTS

- SPARC — Trading BackOffice System:** Developed high-performance backend services for real-time trading workflows using **Java, Spring Boot, Kafka Streams, Redis, and MSSQL**. Implemented event-driven architecture and caching optimization achieving low-latency trade processing. Integrated **Azure Document Intelligence** for automated document extraction and validation; deployed via **Docker on AWS**.
- FundsGenie — Mutual Fund Platform:** Built scalable portfolio management APIs and **Kafka-based event processing** for transactions and NAV updates using **Spring Boot and Hibernate/JPA**. Deployed containerized microservices on **Kubernetes**, improving API response time by optimizing database queries and connection pooling under high user load.

EDUCATION

B.Tech — Electronics & Communication Engineering MES College of Engineering, Kuttippuram, Kerala	2019 – 2023
--	-------------

CERTIFICATIONS

- NISM-Series-VII Certification — National Institute of Securities Markets
- Microsoft Copilot: Productivity Enhancement — Microsoft
- Java: Advanced Concepts for High-Performance Development — LinkedIn Learning
- Programming Foundations: Design Patterns — LinkedIn Learning
